## GISHYDROWEB RELEASE NOTES

### v0.8

05/04/2023

---

#### **INCLUDED IN UPDATE:**

- Users can now download a pdf report of the Basin properties, Land Use distribution, Soil distribution, and Fixed Region Regression Equation results. To access this report users need to run the FRRE first, then the “Create Report” button will become available.
- Added a “Layer Download” tab where users can download project layers once they become available through their respective geoprocesses. Users can download shapefile layers and TIFF rasters.
- Users can now upload their own watersheds (shapefiles). They can use this layer for the project analysis as well.

---

Software glitches and bugs can occasionally happen. If you encounter one of these bugs, please report it to [gis@mdot.maryland.gov](mailto:gis@mdot.maryland.gov)
